

### **Bloom Lesson Starters** (Figure 1 below)

#### Strengths:

- development of critical thinking skills (Bloom et al, 1956).
- builds on each level (Bloom et al, 1956).
- gain a better perspective on the behaviors to be emphasized in instructional planning (Bloom et al, 1956).
- effective learning (Barell, 1995).
- engaged learners (Barell, 1995).
- expands the self-efficacy of individuals (Barell, 1995).
- propels students to operate at higher critical thinking levels (Barell, 1995).
- associated with cognitive, affective and psychomotor skills (Clark, 20123
- acquires new skills, knowledge, and/or attitudes (Clark, 2013).
- encourages active teaching (Schmidt, 2009).
- increased graduation rates (Schmidt, 2009).
- increased motivation (Schmidt, 2009).
- greater academic prowess (Schmidt, 2009).
- increased depth in comprehension of topics (Schmidt, 2009).
- ability to apply knowledge to problem solving (Schmidt, 2009).

#### Weaknesses:

- Students do not need to move through these stages sequentially which is a common misconception (Bloom et al, 1956).
- little consensus about what seemingly self-evident defined terms like “analysis,” or “evaluation” mean (Intel, 2013).
- Educators can spend too much time attempting to classify questions and activities (Intel, 2013).
- worth of learning opportunities diminished (Intel, 2013).

#### Value:

- The stages progress beginning with knowledge, comprehension, application, analysis, synthesis and ending with evaluation (Bloom et al, 1956).
- Through this method, students will develop an insight into themselves as they develop learning strategies, set learning goals, gauge their progress and even assess the results (Barell, 1995).
- The result of the development of lifelong learning is possible through a continual application and hands on experience associated within the learning experiences (Clark, 2013).
- This classification is merely to help educators “gain a better perspective on the behaviors to be emphasized in instructional planning” (Moore, 2012, p. 177).
- Those teachers who keep a list of question prompts relating to the various levels of Bloom’s Taxonomy undoubtedly do a better job of encouraging higher-order thinking in their students than those who have no such tool (Intel, 2013).

**Bloom Lesson Starters** (Figure 1 below)

**Application:**

This method easily is integrated into every lesson planning session and teaching moment. It can be used as a quick reference to help educators keep attention on different learning personalities while ensuring that students reach higher critical thinking skills.

Figure 1: Question starters and classroom activities differentiated according to Bloom’s Taxonomy

Question Starters	Potential Activities
<p><b>Level I: Knowledge</b> (recall)</p> <ol style="list-style-type: none"> <li>1.What is the definition for...?</li> <li>2.What happened after...?</li> <li>3.Recall the facts.</li> <li>4.What were the characteristics of...?</li> <li>5.Which is true or false?</li> <li>6.How many...?</li> <li>7.Who was the...?</li> <li>8.Tell in your own words.</li> </ol>	<p><b>Level I: Knowledge</b> (recall)</p> <ol style="list-style-type: none"> <li>1.Describe the...</li> <li>2.Make a time line of events.</li> <li>3.Make a facts chart.</li> <li>4.Write a list of...steps in...fact...about...</li> <li>5.List all the people in the story.</li> <li>6.Make a chart showing...</li> <li>7.Make an acrostic.</li> <li>8.Recite a poem.</li> </ol>
<p><b>Level II: Comprehension</b></p> <ol style="list-style-type: none"> <li>1.Why are these ideas similar?</li> <li>2.In your own words retell the story of...</li> <li>3.What do you think could happen?</li> <li>4.How are these ideas different?</li> <li>5.Explain what happened after.</li> <li>6.What are some examples?</li> <li>7.Can you provide a definition of...?</li> <li>8.Who was the key character?</li> </ol>	<p><b>Level II: Comprehension</b></p> <ol style="list-style-type: none"> <li>1.Cut out or draw pictures to show an event.</li> <li>2.Illustrate what you think the main idea was.</li> <li>3.Make a cartoon strip showing the sequence of...</li> <li>4.Write a perform a play based on the...</li> <li>5.Compare this ___ with ____.</li> <li>6.Construct a model of...</li> <li>7.Write a news report.</li> <li>8.Prepare a flowchart to show the sequence.</li> </ol>

Question Starters	Potential Activities
<p><b>Level III: Application</b> (applying without understanding is not effective)</p> <ol style="list-style-type: none"> <li>1. What is another instance of...?</li> <li>2. Demonstrate the way to...</li> <li>3. Which one is most like...?</li> <li>4. What questions would you ask?</li> <li>5. Which factors would you change?</li> <li>6. Could this have happened in...? Why or why not?</li> <li>7. How would you organize these ideas?</li> </ol>	<p><b>Level III: Application</b> (applying without understanding is not effective)</p> <ol style="list-style-type: none"> <li>1. Construct a model to demonstrate using it.</li> <li>2. Make a display to illustrate one event.</li> <li>3. Make a collection about...</li> <li>4. Design a relief map to include relevant information about an event.</li> <li>5. Scan a collection of photographs to illustrate a particular aspect of the study.</li> <li>6. Create a mural to depict...</li> </ol>
<p><b>Level IV: Analysis</b></p> <ol style="list-style-type: none"> <li>1. What are the component parts of...?</li> <li>2. What steps are important in the process of...?</li> <li>3. If...then...</li> <li>4. What other conclusions can you reach about...that have not been mentioned?</li> <li>5. The difference between the fact and the hypothesis is...</li> <li>6. The solution would be to...</li> <li>7. What is the relationship between...and...?</li> </ol>	<p><b>Level IV: Analysis</b></p> <ol style="list-style-type: none"> <li>1. Design a questionnaire about...</li> <li>2. Conduct an investigation to produce...</li> <li>3. Make a flow chart to show...</li> <li>4. Construct a graph to show...</li> <li>5. Put on a play about...</li> <li>6. Review...in terms of identified criteria.</li> <li>7. Prepare a report about the area of study.</li> </ol>
<p><b>Level V: Synthesis</b></p> <ol style="list-style-type: none"> <li>1. Can you design a...?</li> <li>2. Why not compose a song about...?</li> <li>3. Why don't you devise your own way to...?</li> <li>4. Can you create new and unusual uses for...?</li> <li>5. How would you deal with...?</li> <li>6. Invent a scheme that would...</li> </ol>	<p><b>Level V: Synthesis</b></p> <ol style="list-style-type: none"> <li>1. Create a model that shows your new ideas.</li> <li>2. Devise an original plan or experiment for...</li> <li>3. Finish the incomplete...</li> <li>4. Make a hypothesis about...</li> <li>5. Change... so that it will...</li> <li>6. Propose a method for...</li> <li>7. Prescribe a way to...</li> <li>8. Give the book a new title.</li> </ol>

Question Starters	Potential Activities
<p><b>Level VI: Evaluation</b></p> <ol style="list-style-type: none"> <li>1. In your opinion...</li> <li>2. Appraise the chances for...</li> <li>3. Grade or rank the...</li> <li>4. What do you think should be the outcome?</li> <li>5. What solution do you favor and why?</li> <li>6. Which systems are best? Worst?</li> <li>7. Rate the relative value of these ideas to...</li> <li>8. Which is the better bargain?</li> </ol>	<p><b>Level VI: Evaluation</b></p> <ol style="list-style-type: none"> <li>1. Prepare a list of criteria you would use to judge a ... Indicate a priority ratings you would give.</li> <li>2. Conduct a debate about an issue.</li> <li>3. Prepare an annotated bibliography...</li> <li>4. Form a discussion panel on the topic of...</li> <li>5. Prepare a case to present your opinions about...</li> <li>6. List some common assumptions about... Rationalize your reactions.</li> </ol>
